PROFESSIONAL SUMMARY

Technology professional with 4+ years of experience across NOC Engineering, Site Reliability and Data Engineering, transitioning into Data Analytics and Business Intelligence. Hands-on skills in SQL, Power BI, DAX, Power Query, Excel and Python, with portfolio experience in dashboard development, data cleaning, KPI reporting and business analysis. Strong background in production monitoring, incident analysis, troubleshooting and cloud-based operations, bringing structured problem-solving and operational knowledge to analytics roles.

TECHNICAL SKILLS

Data Analytics: SQL, MySQL, Excel, Python, Data Cleaning, Exploratory Analysis

Business Intelligence: Power BI Desktop, Power BI Service, DAX, Power Query (M), Data Modelling, KPI Reporting, Data Visualization

Data Engineering: ETL Fundamentals, Hadoop, Hive, Data Pipelines, Data Validation, Shell Scripting, Linux

Operations & Cloud: NOC Operations, Site Reliability, Splunk, Datadog, SolarWinds, SuppressLogic, AWS, Azure

Tools: MySQL Workbench, SQL Server Management Studio, Git/GitHub

PROFESSIONAL EXPERIENCE

NOC Engineer | eClinicalWorks Pvt. Ltd. Sep 2023 – Present

- Monitor and troubleshoot production environments, applications and infrastructure using enterprise monitoring and observability tools.
- Perform incident analysis, service monitoring, issue triage and escalation while maintaining operational reliability and SLA-focused support.
- Use Splunk Enterprise Cloud and monitoring platforms for log analysis, alert investigation and production troubleshooting.
- Contributed to cloud migration and operational activities, strengthening experience in cloud-based production environments.
- Received a Rising Star Award for performance and contribution.

Site Reliability Engineer | Crest Data System Nov 2022 – Aug 2023

- Supported reliability and operational activities across production systems, focusing on monitoring, troubleshooting and service availability.
- Worked with Linux, shell scripting and automation-oriented tools to investigate incidents and improve operational workflows.
- Collaborated with technical teams on issue resolution, root-cause analysis and production support.

Data Engineer Trainee | Futureense Technologies Apr 2022 – Nov 2022

- Developed foundational experience in ETL processes, data pipelines, structured data handling and data validation.
- Worked with Python, SQL, Linux and shell scripting concepts in data engineering and analytics-oriented exercises.
- Built understanding of data transformation, database management and analytical data structures.

SELECTED DATA ANALYTICS PROJECTS

Business Insights 360 | Power BI Portfolio Project

- Built a multi-view Power BI business intelligence solution covering **Sales, Marketing, Supply Chain and Finance** perspectives.
- Applied **Power Query, data modelling and DAX** to transform data, create analytical measures and develop interactive business insights.

TOLA Cabs – Ride Booking & Operations Analytics | Power BI / MySQL Portfolio Project

- Developed an operational analytics solution for cab bookings, analyzing **booking outcomes, cancellations, success rates and key operational KPIs**.
- Generated and managed a structured booking dataset in **MySQL** and developed interactive Power BI dashboards for operational analysis.

Retail Sales Analytics | SQL / MSSQL Portfolio Project

- Developed a SQL-based retail analytics solution using **joins, aggregations, grouping and filtering** to answer business-focused sales questions.
- Used **MSSQL** to analyze retail sales data and derive actionable insights from transactional information.

EDUCATION

Bachelor of Engineering in Computer Science | Chandigarh University 2022

Senior Secondary | N.K. Public School 2017

Secondary | N.K. Public School 2015

AWARDS

- **Rising Star Award** – eClinicalWorks, for strong performance and contribution.
